

Restart Shut-In Wells

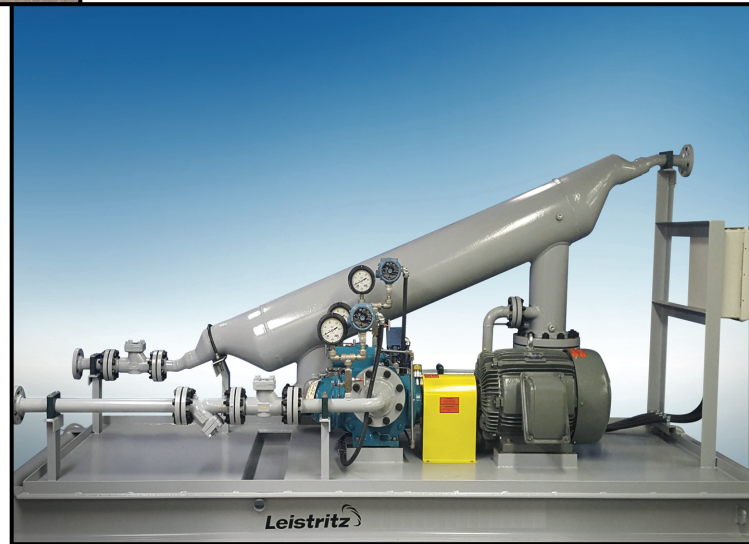

Multiphase Well Service Pump Unit

Leistritz

If you have **shut-in wells** that you are planning to restart, you will encounter issues that may strain your current equipment and artificial lift systems. **Avoid** excessive load and **complications** from gas cap surges and water ingress.

With a **Leistritz Multiphase Well Service Pump Unit**, you can greatly reduce the shock to ESPs, sucker rod pumps and plungers while at the same time manage any production issues as your wells come back **flowing again**.

Leistritz Try Then Buy Program*

No obligation - use in your application, in your environment,
and we will provide results.
